AI For A Better World

A Bavarian-French Artificial Intelligence Challenge

AI-Cup
Award Ceremony

Join us at the AI-Cup award ceremony to attend the exciting idea pitches of the **AI-Cup winning teams** and network with experts and future AI start-ups.

When? 11th October 2022, 15:00
Where? Design Office München Atlas, Rosenheimerstraße 143 c, 81671 Munich
Registration? Email to ai-cup@uni-passau.de

More information: http://www.ai-cup.uni-passau.de/en/

In cooperation with

Gründerland Bayern

Supported by
Bayerisches Staatsministerium für
Wirtschaft, Landesentwicklung und Energie

Bayerische Staatskanzlei

AI-Cup Winning Teams

AI-Cup is a Bavarian-French Artificial Intelligence Challenge organised by the University of Passau. Over the last four months, several teams across Germany and France have competed through scientific and entrepreneurial challenges in order to win up to 95,000 euros in start-up support. As a result, eight teams were selected as winners and kick-started the founding process of their AI start-ups in Bavaria.

Join us at the AI-Cup Award Ceremony on 11.10.2022, 15:00, at Design Office München Atlas to attend the idea pitches of the following winning teams. Register yourself by sending an email to ai-cup@uni-passau.de.

M3DICA	AI-driven 3D healthcare for objective diagnosis of skin cancer | Healthcare industry
cAIsar	SaaS solution for architects to build sustainable and high-quality designs | Construction industry
CareerCaptain	AI-based orientation test and virtual corporate world/internships tour to create a holistic recruiting approach | Educational sector
SemorAI	AI as a service to optimise process & product quality through data-based FMEA | Manufacturing industry – smart production
Extinct	Digital agronomic platform to optimise sustainable agriculture | Agricultural analytics industry – Precision farming
AIrerum	AI-powered IoT hardware platform | Broad range of industries, including manufacturing, supply chain, mobility and security
AITAU	Platform/hub to provide synthetic data, knowledge and tools to researchers and practitioners | Healthcare/Energy sector
360° Quick Check	AI-powered software tool to analyse and optimise the digital performance of SME | Communication & Consulting industry
